SUMMARY

Supply chain professional moving into product and UX design. I bring three years of measuring real workflows, cutting cost against fixed constraints, and aligning stakeholders who do not report to me. I design and ship interfaces now, and I test them with users before I build.

DESIGN WORK

kaushikhegde.com , personal portfolio (design and build)

- Designed and hand-coded a static portfolio site with no framework and no build step.
- Set a single "Field Manual" concept, so the whole site reads as one technical spec sheet.
- Built a continuous one-scroll homepage with GSAP scroll motion on desktop.
- Added a CSS sticky fallback on phones after GSAP pinning broke the mobile stack.
- Handled reduced-motion users with a static state, so motion never blocks access.

Find the Tempo , screenshot-to-links web app (findthetempo.netlify.app)

- Built a Next.js app that turns a screenshot of songs into openable streaming links.
- Ran two bias-free research surveys, one for DJs and one for everyday listeners.
- Found a product-market-fit risk for the consumer version from the survey work.
- Cut scope from full playlist creation to query-search links, because API cost did not fit the user base.
- The target segment is still an open question, and the next step is to field the surveys and decide.

Airbnb mobile app , UX case study

- Found five friction points in the booking and Trips flow.
- Ran a user survey to check the problems against real people.
- Wrote each finding as a problem, a decision, and an expected outcome.

EXPERIENCE

Executive, Material Planning and Logistics , Volvo Auto India Pvt Ltd Dec 2023 to Jul 2026 , Bengaluru

- Built a Power BI dashboard for live inventory, and cut manual reporting by 30 minutes each week.
- Ran a forecasting model on past data, and removed ₹24 lakh of excess inventory each year.
- Localized a coolant supplier, and cut cost by 43% with no drop in quality.
- Designed an ABC and two-bin system for spare parts, so the line stopped hitting stockouts.
- Led monthly plan reviews with senior stakeholders across four international plants.

Graduate Apprentice Trainee, Logistics , Volvo Group Pvt Ltd Dec 2022 to Dec 2023 , Bengaluru

- Observed operators on the CKD kitting line, and mapped the workflow with spaghetti diagrams.
- Cut 24 minutes of operator time each day from the mapped result.
- Ran a feasibility study with cost-benefit analysis, and stopped high-cost low-return spend.

Production Planner and Design Engineer , Concord United Pvt Ltd Oct 2022 to Dec 2022 , Bengaluru

- Built 3D pallet die models in SolidWorks, and worked with senior designers on manufacturability.

SKILLS

HARD SKILLS

- User research and survey design
- Usability review
- Information architecture
- Interaction design
- UX writing
- Workflow mapping
- Data-informed decisions
- Constraint trade-off
- Front-end implementation

SOFT SKILLS

- Stakeholder alignment
- Cross-functional work
- Problem solving
- Clear written communication
- Self-directed learning

TOOLS

- Figma
- Affinity suite (Designer, Photo, Publisher)
- HTML, CSS, JavaScript
- Next.js and React
- GSAP
- Power BI with DAX
- SAP
- Advanced Excel
- Git and GitHub

I also write and publish Claude skills on GitHub. Each one encodes a repeatable process as a written spec: `ux-research-questions` (bias-free survey and interview design), `beginner-design-case-study` (turns a friction point into a structured case study), `portfolio-feedback` (structured portfolio critique), `obsidian-notes-taking` (a Zettelkasten system), `convert-to-md` and `caveman` (file-to-markdown token compression), `instagram-post`, `instagram-carousel`, `instagram-story` (platform design specs), and `ste-writing` (controlled-language writing rules).

EDUCATION AND CERTIFICATIONS

Bachelor of Engineering, Mechanical Engineering, Mangalore Institute of Technology and Engineering, Jul 2018 to Aug 2022

- Power BI Desktop for Business Intelligence, Maven Analytics (Udemy)
- Power BI Data Modeling with DAX, LinkedIn Learning
- Python for Everybody Specialization, University of Michigan (Coursera)
