Professional Summary

Data-driven Supply Chain Professional with expertise in material planning, logistics coordination, and process optimization in automotive manufacturing. Proven track record of leveraging data analysis and Power BI to drive cost reductions, enhance inventory control, and improve operational efficiency. Strong background in MRP, JIT inventory management, and cross-functional stakeholder management with measurable business results.

Core Competencies

- Supply Chain Management
- Material Requirements Planning (MRP)
- Production Planning
- Inventory Management (JIT, Kanban, Two-Bin System)
- Vendor Management
- Process Improvement
- Risk Mitigation
- Demand Planning

Technical Skills

- SAP SRM, SAP ERP, SAP S/4HANA, SAP MM
- Advanced Microsoft Excel
- Power BI Dashboard, Data Modeling, DAX
- Forecasting and Analytics
- SolidWorks
- Python

Professional Skills

- Stakeholder Management
- Cross-Functional Collaboration
- Data Analysis & Visualization
- Problem Solving
- Project Coordination
- Strategic Planning

Professional Experience

Executive - Material Planning and Logistics

Volvo Auto India Pvt Ltd | Dec 2023 – Present | Bengaluru, India

- Manage end-to-end material planning for assembly of 180–240 vehicles monthly across 6 models from 4 international plants using Excel and SAP.
- Developed linear forecasting model using historical data, reducing excess inventory and saving ₹24 Lakh annually.
- Led localization of coolant supplier, cutting procurement cost by 43% without quality compromise.
- Improved JIT inventory flow, reducing spare parts lead time by 40% (from 5 to 3 days).
- Designed Power BI dashboard for real-time inventory tracking, saving 30 minutes weekly in manual reporting.
- Implemented ABC analysis and 2-bin system for spare parts to prevent line-side stockouts.
- Lead monthly production plan reviews with senior stakeholders and managed SRM PO release process.

Graduate Apprentice Trainee - Logistics

Volvo Group Pvt Ltd | Dec 2022 – Dec 2023 | Bengaluru, India

- Conducted time & motion studies in CKD kitting process, saving 24 minutes of operator time daily.

- Performed feasibility study with spaghetti diagrams and cost-benefit analysis, preventing high-cost low-return investments.
- Improved inventory data accuracy by optimizing stock check frequency.
- Designed ergonomic trolley solutions enhancing operator safety and workflow.

Production Planner and Design Engineer

Concord United Pvt Ltd | Oct 2022 – Dec 2022 | Bengaluru, India

- Developed daily production and capacity plans for Wire EDM machines to improve forecast accuracy.
- Created 3D pallet die models in SolidWorks and collaborated with senior designers on manufacturability improvements.

Education

Bachelor of Engineering in Mechanical Engineering

Mangalore Institute of Technology and Engineering | Jul 2018 – Aug 2022

Certifications

- Power BI Desktop for Business Intelligence – Maven Analytics (Udemy)
- Learning Power BI Desktop – LinkedIn Learning
- Power BI: Data Modeling with DAX – LinkedIn Learning
- Python for Everybody Specialization – University of Michigan (Coursera)
